Canon LiDE700F A4 2400 x 4800dpi USB Scanner	\$249.00
LiDE scanner with CIS sensor, Innovative 3-way design. Powered by USB 2.0 cable 9600x9600dpi film scanning . Incredibly high resolution 9600x9600dpi scans from 35mm film are possible thanks to a dedicated clip-on film scanning unit (supplied). This means massive enlargements and intricately detailed prints can be achieved from your 35mm film negatives/positives.4800x4800dpi reflective scanning. 48bit colour. Auto Scan Mode. Configurable EZ buttons. Automatic QARE dust and scratch removal	
Canon C5600F	\$269.00
Produce scans with spectacular resolution of up to 4800 x 9600 color dpi. Rich, vivid color: 48-bit color depth yields over 281 trillion possible colors. Multi-image scanning: To save time, simultaneously scan up to 6 frames of 35mm film (negatives or positives). The USB 2.0 interface enables the fastest possible image transfers and scanning speeds. Great scans from any angle: Position it facing you, turn it 90 degrees, or place it on its side (with included stand) to save space. Copy / scan thick originals: Produce clean copies / scans even of thick items that do not lie flat on the platen. Incredible resolution: The included software greatly enhances resolution, up to an amazing 19,200 color dpi. Old photos look new: Built-in retouching technology removes much of the dust and scratches on original prints, and revives faded images. One convenient cable to your computer provides both a USB connection and power. Large function buttons automate the scanning process - select the use for the image, and it's ready in seconds.	
Canon CS8800F A4 4800 x 9600dpi USB Scanner	\$379.00
